

Easy Activities to Get your Dog Sniffing

Hide and Seek

Hide treats around your home and have your dog sniff them out! Have your dog watch you hide them at first, and cue them to “find it!” Once they are good at finding the treats, have them wait in another room and hide treats in progressively more difficult spots.

Containers

Pick a dog-safe scent and put it in a container. Mark “yes” and give your dog a treat when they sniff it. Slowly add in more containers, only one of which has the smell. Mark and reward your dog for locating the right one.

Grass Snuffle

Throw kibble or treats into your backyard or another grassy area for your dog to find. Start with a small area and increase the space over which the dog has to find the food as they are successful.

Which One?

Put a treat under a cup or in your hand and reward your dog for sniffing out where it is! Add more cups/choices as they are successful.
