Meet Ella Grace.

Ella Grace is a one-of-a-kind little girl. Full of life and never without a smile on her face, Ella enjoys sports like swimming and competitive skating. She is driven, loving, passionate, and determined to help others. In many ways, Ella is just like any other kid her age, but with one big exception - she has been diagnosed with two rare gastrointestinal motility disorders: colonic neuropathy pseudo-obstruction and a rectal dysmotility. To manage these disorders, she has had countless tests, procedures, hospital stays, and surgeries, all of which have been unsuccessful in treating her symptoms. To improve her quality of life and allow her to enjoy her favourite activities again, Ella has had a partial colectomy and is currently living with an ileostomy bag.
